*I* am interested in combining digital fabrication and traditional craftsmanship in furniture making. The passion comes from believing in providing utiliarian and simple designs to the people. My development has progressed into website design and programming to fulfill customization through technology for bespoke and thus sustainable manufacturing.

International Bacclaureate
British International School Vietnam

Diploma Engineering Studies
Monash College Melbourne

BSc Industrial Design
Eindhoven University of Technology

MA Product and Furniture Design
Kingston University London

PLYKEA Ltd.

| 2008 - 2010 | 2011 - 2013 | 2013 - 2017 | 2018 - 2020 | 2020 - Present |

Projects

TOTONOU
A Vue project that utilizes the organisation features of Nuxt and the database of Firebase to create a user access e-commerce site. Checkout is set up with Stripe.

Vue | Nuxt | Firebase   totonou-project.web.app

Boulder//Britain
It creates a community of logged in users, allowing them to view boulders on a map, create routes by uploading images and info, and finally being able to rate and comment.

Node | Express | MongoDB   boulder-britain.herokuapp.com
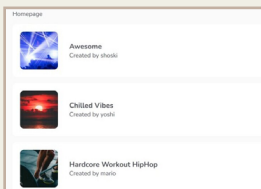

Hiep Phat Website
The website was built to client's requests. First presenting an AdobeXD draft then developing it with HTML & CSS. The job included logo design, photography and video-making as well.

**HTML & CSS**   hiepphat-net.com

Creativo
It's a simple app that allows user's to create playlists with lists of musics and each playlist with an accompanying image.

Vue3 | Firebase   creativo-ecae0.web.app

Listella
This to-do app is a project that utilizes design and interaction, putting user experience as the main purpose so that it's use is intuitive.

Vuetify | Firebase   listella.netlify.app
